INDIVIDUAL MOBILIZATION AUGMENTEE (IMA)

- **Screening and orders done by MCRSC.**
- **MCRSC reports individual transaction to transfer to GFC. (Mobilization TTC)**
- **Creates a component code of KM – mobilized in support of contingency ops.**
- **GFC reports initial join to active duty and all other applicable transactions.**
- **GFC reports crisis code – contingency identifier.**

INDIVIDUAL READY RESERVE (IRR)

- **Screening and orders done by MCRSC.**
- **MCRSC reports individual transaction to transfer to MPC. (Mobilization TTC)**
- **Creates a component code of KM – mobilized reservist.**
- **MPC reports initial join to active duty and all other applicable transactions.**
- **MPC reports crisis code – contingency identifier.**
- **MPC reports To TAD Excess to the GFC.**
- **GFC reports Individual Location Code.**

SELECTED MARINE CORPS RESERVE (SMCR)

- Mobilization Monitored Command Code (MobMCC) must be accurate.
- Detachments can be created with a new MobMCC.
- All records with the MobMCC will have a transfer generated – creates component code of KM – mobilized reservist.

SELECTED MARINE CORPS RESERVE (SMCR)

- Site Support Unit reports initial join and all other applicable transactions – including the crisis code – contingency identifier.
- Site Support Unit reports To TAD Excess on mobilized members who continue on to another duty station.
- The individual location code is reported reflecting the new location.

CRISIS REPORTING

09/02/16

- JCS, J-1 utilizes the J-4 CJCS project codes established for contingency operations IOT track personnel in support.
- DMDC publishes new project codes to MI Division IOT collect and process personnel in support of a new contingency operation.
- The Crisis Code identified for Operation Enduring Freedom is ‘9GF’.
- Crisis tracking is required for all members serving under this contingency.

CRISIS REPORTING

09/02/16

- DoDi 1336.5 Enclosure (5) directs the processing of crisis code information to DMDC.
- Marine Corps currently provides crisis information in a format predating DoDi 1336.5 dated 26 March 1999.
- In May of 2003, the Marine Corps will better comply with the format established in DoDi 1336.5 dated 26 March 1999.

PERSTEMPO/DEPTEMPO

09/02/16

- DoDi 1336.5 dated 2001 Enclosure (5) changed the reporting requirement.
- Crisis Information was no longer required, but PersTempo/DepTempo was required.
- Post-September 11, 2001, DMDC identified that this version did not include contingency data.
- DMDC and USMC agreed to process two separate files for contingency information and perstempo information.

DMDC FILES

- **Marine Corps processes all active duty and reserve transactions pertaining to contingency data and perstempo data with every cycle.**
- **There are five cycles per week.**
- **Reservists mobilized in support of a contingency operation (OEF) are identified by their component code of KM and crisis code of 9GF.**
- **Their location is identified by an individual location code that includes country, state and city or foreign country codes.**

MCTFS REPORTING FOR DEMOBILIZATION

09/02/16

- The Separation Program Designator for demobilization is ‘MBK5’. The Type of Service code is ‘H’.
- The Reserve unit must report a Join From Release from Active Duty to gain the record back to IRR, IMA, or SMCR.
